

Xinyi Chen

Zhejiang University, Hangzhou, China | cadrenaline@zju.edu.cn

Research Interests

Human-AI Collaboration, Creativity Support, Visualization, Multi-Agent Systems, Interactive Narrative

Education

Zhejiang University – Hangzhou, China

Sep. 2023 – Present

M.S. in Industrial Design Engineering

- **GPA: 4.34/5.00**
- **Advisor:** Prof. Chunlei Chai
- **Coursework:** Intelligent Design, Parametric Modeling Techniques, Design Research

Northeastern University – Shenyang, China

Sep. 2019 – Jun. 2023

B.S. in Digital Media Technology

- **GPA: 4.04/5.00**, Ranking: 2/62
- Got a **China National Scholarship** for outstanding students.
- **Coursework:** Rendering Technology, Game Design, Game Planning, 3D Modeling, Virtual Reality Technology

Publications

Research Experience

HCI Initiative, Hong Kong University of Science and Technology (HKUST)

Feb. 2025 – Sep. 2025

Research Intern, Advised by: Prof. Xiaojuan Ma

- **Project: Embodied role-play and reflective questioning for co-creative scripting**
Implemented a full-stack system (FastAPI, Next.js, React, Tailwind, Radix UI); integrated LangChain multi-agent workflows; semantic retrieval with SentenceTransformers and FAISS.
Conducted a literature review, ran two rounds totaling 23 test iterations, performed data preprocessing, led the pilot and main experiments, and conducted quantitative analysis.
Output: Functional prototype; manuscript under review.

IABC Lab, Zhejiang University

Oct. 2023 — Feb. 2025

Graduate Researcher, Advised by: Prof. Chunlei Chai

- **Project: Human-AI collaborative video-production framework**
Validated prototypes with manual workflows; designed a hybrid architecture mapping multimodal inputs to professional-grade outputs; built mapping rule sets and prepared training data; planned LLM fine-tuning

grounded in cinematic rules.

Output: Validated prototype

- **Project: Intelligent packaging design system**

Built a parametric packaging box generator with Geometry Nodes; integrated a back end for automated scene rendering, material mapping and UV unwrapping.

Output: Automated end-to-end rendering pipeline base on Blender.

- **Project: Model evolution system based on interactive genetic algorithm**

Designed target components via Geometry Nodes; extracted parameters using the Blender Python API; rendered resulting images.

Output: Interactive model-evolution prototype.

Future Design Lab, Zhejiang University

Dec. 2023 - Jun. 2024

Research Intern, Advised by: Prof. Chunlei Chai

- **Project: Fine-tuning workflows for the apparel industry**

Built high-quality garment design datasets; evaluated generation quality; explored virtual try-on; studied detail preservation and style transfer; compared multiple models for garment display.

Output: Internal benchmarks and curated datasets for subsequent experiments.

The Center for Education and Research in X-Reality, Northeastern University

May 2022 - Jul. 2022

Research Assistant, Advised by: Prof. Tianhan Gao

- **Project: Cloud rendering combined with streaming multi-terminal virtual simulation teaching platform**

Led web prototyping and interaction design; built front-end pages with React and Fluent UI.

Output: The teaching platform provided for use in universities.

Work Experience

Kaon (prev. FlowGPT)

Nov. 2025 - Mar. 2026

AI Technology Operations Intern

- Optimized LLM System Prompts, presets, and sampling parameters, establishing quantitative evaluation frameworks to maximize output quality, safety, and user experience.

Hangzhou Zaowu Technology Co., Ltd.

Apr. 2024 - Nov. 2024

Generative AI Engineer

- ComfyUI image-generation workflows.
- SDXL DreamBooth and LoRA fine-tuning.
- Human-AI collaborative video generation research.

Awards

- | | |
|---|------|
| • Merit Award, The 1st Global Digital Intelligence Education Innovation Competition | 2024 |
| • First-Class Merit Scholarship, Northeastern University | 2022 |
| • Outstanding Student, Northeastern University | 2022 |
| • Third Prize, International Mathematical Contest in Modeling (ICM) | 2022 |
| • National Scholarship, Ministry of Education of China | 2021 |

Skills

- **Programming:** Python, PyTorch, TensorFlow, TypeScript, modern web stack
- **ML/AI:** Prompt Engineering, Multi-Agent (LangChain), Fine-tuning (DreamBooth, LoRA)
- **Methods:** Experimental Design, Quantitative Analysis, User Study
- **Software:** Figma, Blender, C4D, Unity 3D, Adobe products
