

Xinyi CHEN

Zhejiang University, Hangzhou, China | ceterminateniya@gmail.com | nanoniya.github.io

Research Interests

Human-AI Collaboration, Creativity Support, Conversational Agent, Multi-Agent System, Human-Centered NLP

Education

Zhejiang University - Hangzhou, China

Sep. 2023 - Present

M.S. in Industrial Design Engineering

- **GPA: 4.34/5.00; Advisor:** Prof. Chunlei Chai
- **Coursework:** Intelligent Design, Parametric Modeling Techniques, Design Research

Northeastern University - Shenyang, China

Sep. 2019 - Jun. 2023

B.S. in Digital Media Technology

- **GPA: 4.04/5.00**, Ranking: 2/62; Got a **China National Scholarship** for outstanding students.
- **Coursework:** Rendering Technology, Game Design, Game Planning, 3D Modeling, Virtual Reality Technology

Publications

Research Experience

Center for Metaverse and Computational Creativity (MC²), HKUST

Jun. 2026 - Sep. 2026

Research Intern, Advised by: Prof. Pan Hui

- **Project: Human-AI collaborative feedback system.** Developed and evaluated an LLM-based feedback workflow for open-ended text revision. Under a unified evaluation schema, LLM-based evaluations were directionally aligned with human preference judgments. Manuscript under review.

Human-Computer Interaction Initiative, HKUST

Feb. 2025 - Sep. 2025

Research Intern, Advised by: Prof. Xiaojuan Ma

- **Project: Experience-grounded feedback for screenplay reflection.** Built a full-stack multi-agent system that combines character role-play with reflective feedback for screenplay revision. A formative study with nine professional screenwriters informed the design; a user study with fourteen showed improved feedback quality and alignment and greater effectiveness, depth, and richness of reflection. Published at CHI 2026.

AI & Art for Knowledge & Creativity (ARK) Lab, HKUST

Jul. 2026 - Sep. 2026

Research Intern, Advised by: Prof. Xin Tong

- **Project: Cross-device multi-agent collaboration.** Developing and studying a cross-device multi-agent workflow that supports context sharing, capability coordination, and continuity across heterogeneous devices while preserving user control. Manuscript under review.

IABC Lab, Zhejiang University

Oct. 2023 - Feb.2025

Graduate Researcher, Advised by: Prof. Chunlei Chai

- **Human-AI collaborative video production.** Prototyped and iteratively tested a workflow that maps multimodal inputs to production-oriented video outputs; developed cinematic rule sets and prepared fine-tuning data.

Work Experience

Kaon (prev. FlowGPT)Nov. 2025 - May 2026

AI Technology Operations Intern

- Developed preference-aware agents for role-play and emotional companionship; optimized prompts, presets, and sampling parameters for diverse user preferences.
- Designed multidimensional metrics and test protocols for frontier model evaluation; this work informed an ongoing research direction on adaptive benchmarking for open-ended, multi-turn chatbot conversations.

Hangzhou Zaowu Technology Co., Ltd.Apr. 2024 - Nov. 2024

Generative AI Engineer

- Built ComfyUI image-generation workflows; fine-tuned SDXL with DreamBooth and LoRA; explored human-AI collaborative video generation.

Selected Awards

• Merit Award, The 1st Global Digital Intelligence Education Innovation Competition	2024
• First-Class Merit Scholarship and Outstanding Student, Northeastern University	2022
• Third Prize, International Mathematical Contest in Modeling (ICM)	2022
• National Scholarship, Ministry of Education of China	2021

Skills

- **Programming:** ~~W~~TeX, Python, TypeScript; Front-End Development (HTML/CSS, React, Next.js); Back-End Development (FastAPI)
- **AI & Data:** Machine Learning (PyTorch, TensorFlow, scikit-learn); LLM System (LangChain, semantic retrieval, prompt engineering); Data Analysis (NumPy, Pandas, SPSS)
- **HCI Methods:** Experimental Design, Interview, Think-Aloud Protocol, Thematic Analysis, Quantitative Analysis
- **Design & Prototyping:** UX Prototyping (Figma); 3D and Interactive Prototyping (Blender, C4D, Unity 3D)
